

FIG.1

FIG.2

The diagram illustrates a water pump system for a building. The system includes an outdoor unit (20) with a pump (11) and a motor (12). The pump is connected to a network of pipes (13, 14) that supply water to various indoor units (30, 40, 50, 60, 70, 80). The indoor units are shown in cross-section, revealing internal components like fans (15, 22) and heat exchangers (210, 230, 240, 250). The diagram illustrates the flow of water from the outdoor unit to the indoor units and back.
